INTRODUCTION

In the first quarter of year 2007, the PRC's gross domestic products (GDP) increased by 11.1% and the PRC's consumer price index (CPI) increased by 2.7% when compared to the same period last year. During the first quarter, the price of major raw materials for production remained at a high level. Due to successful control on its overall operation and efficient product strategy, turnover for instant noodles, beverage and bakery have increased by 29.44%, 17.90% and 2.52% to US\$351 million, US\$277 million and US\$25 million respectively. At the end of the first quarter, trade receipts in advance sharply increased 100.16% to US\$163.098 million when compared with the same quarter last year, which demonstrated a strong growth driver for the beverage business. During the period, market shares for the Group's key products continued to increase, thus further extend the Group's leading position in the PRC Instant Noodle and Beverage market.

On 4 May 2007, Morgan Stanley Capital International (MSCI) Barra announced that Tingyi (Cayman Islands) Holding Corp. will be added to the MSCI Hong Kong Index and the addition will be effective after the market closes on 31 May 2007. This helps further building up investors' confidence in the Group and reflects that the Group has gained its reputation among investors.

2007 FIRST QUARTERLY RESULTS

Notes:

1. Basis of preparation and accounting policies

The Directors are responsible for the preparation of the Group's unaudited first quarterly financial statements. These unaudited first quarterly financial statements have been prepared in accordance with Hong Kong Accounting Standard No 34 "Interim Financial Reporting", issued by the Hong Kong Institute of Certified Public Accountants. These condensed quarterly financial statements should be read in conjunction with the 2006 annual financial statements. The accounting policies adopted in preparing the unaudited quarterly financial statements for the three months ended 31 March 2007 are consistent with those in the preparation of the Group's annual financial statements for the year ended 31 December 2006.

2. Revenue and segment result by major products

The Group operates mainly in The People's Republic of China (the "PRC"). Revenue and contribution to the Group's profit are mainly from the PRC.

MANAGEMENT DISCUSSION AND ANALYSIS

During the first quarter, the prices of some staple raw materials such as palm oil, flour and PET resin remained high and their prices vary in fluctuation from 4% to 34% when comparing with the corresponding period last year. Coupled with the impact of varying seasonal patterns in intercalary year, sales growth for beverage have been delayed and the Group's business sales mix was affected slightly. The continuing prudent methods adopted by the Group in production management have generated positive results in cost controls. Under the pressure of high raw material price, the Group's gross margin dropped 1.07 ppt. from last first quarter's 32.49% to this first quarter's 31.42%. The firm and steady sales strategy towards optimizing the sales of the products has, however, resulted in the Group's achievement in an aggressive 30.73% growth in sales of high-end noodles although the overall market remained stagnant. The application of such a strategy has also helped to bring about a colossal growth in the sales of Ready-to-drink Tea and Mineralized Water.

In the first quarter, the Group's successful "Better Access, Broader Reach" distribution strategy and well control in advertisement and promotion costs led to the decrease in the distribution costs as a percentage of total sales by 0.93 ppt. to 16.22% when compared to the same period in 2006. Profit before taxation grew by 20.64% to US\$80.220 million.

Instant Noodle Business

In the first quarter, turnover for the instant noodle business was US\$351.353 million, increased by 29.44%, representing 52.07% of the Group's total turnover.

During the said period, the Master Kong noodles continued to focus on the "Soy-braised Beef Noodles" to penetrate into more extensively and broadly into various sales regions. The concept products of Chinese dainty food created by the Master Kong noodles continued to adopt dainty edibles from various regions as the flavor of our instant noodles, and the adoption of such strategy has not only constantly satisfied the consumers' tastes but also gained great achievements in the Group's performances. Among the great many products of the Master Kong noodles, the "Mian-Ba La Mian" noodles have become the symbol of quality noodles in Mainland China. It had consolidated the requisite requirements of "noodles-making experts" and thus gained the confidence of consumers and connoisseurs; and the "Soup King" noodles had gained its fame as the best recipe in soup decoction and had acquired the leading position with regards to the images of noodles in soup; whilst "The Best Asian Series" noodles suited the taste requirement of young people by developing its Asian flavor thus creating the new leadership in accordance with the prevailing trend. "Your Flavors Series" noodles and the "Soy-braised Beef Fried Noodle" continued last years' strategy and went to the market through T.V. and network media with entirely new package all over the country. The series have since become the No.1 brand in the market of fried noodles. The low-end noodle Fu-Man-Dou continued their fast development in the developing cities and villages.

According to the up-to-date retail sales data gathered by ACNielsen in 2007, the overall China instant noodles market reflected a negative growth of 3.83% by sales value and a negative growth of 15.13% by sales volume in the first quarter due to market factors. Since the price of materials remained high and low-end noodles manufacturers reduced their investment, the market in the first quarter was being reorganized. During the period, in light of the Group's adjustments for sales mix of products and sales strategies which stimulated the growing markets for container noodles and high-end packet noodles, sales in value and volume of high-end noodles increased by 30.73% and 31.98% respectively over the same period of last year and the Group continued to acquire market share for high-end noodles. According to the up-to-date retail sales data gathered by ACNielsen for the month of March, Master Kong noodles had a market share of as high as 67.7% and 63.4% respectively for high-end packet noodles and container noodles. Fu-Man-Duo brand is the Group's major brand to enter the low-end noodles market. Its sales in the first quarter of 2007 represented an increase of 21.94% as compared with the same period of last year. According to the information of ACNielsen, Fu-Man-Duo brand acquired a 12.9% share of the low-end market in the first quarter and ranked third in the low-end noodles market. It is actively challenging leading manufacturers. The market share of the Group's instant noodles products in the overall China market was 45.8%, and it continued to hold firmly the No.1 position in the market.

During the first quarter, the price of palm oil, which is the main raw material of instant noodle, sharply increased by 34%. Thanks for the increase in sales of the high margin container noodles and high-end noodles, good cost control as well as continued efficiency improvements, gross margin for instant noodle only slightly dropped 0.26 ppt. to 24.87% when compared with same period last year. Due to the successful marketing strategies and well control in operating costs, profit attributable to equity holders of the Company was US\$24.605 million, sharply grew by 30.83%.

The consumption in Japan, Taiwan and Hong Kong was more than 40 packs per year and the PRC consumers only consumed less than 20 packs per year. In long term, the PRC instant noodle market still has a huge potential to develop. Going forward, the Group will continue in the brand investment and to exert every possible effort so as to enhance the transparency of the Group's products.

Beverage Business

In the first quarter of 2007, under the impact of varying seasonal patterns in intercalary year, the overall beverage market of China only recorded a mere growth of 9.1% over the previous year. The Group's beverage turnover, increased by 17.90% to US\$277.048 million as compared with the same period of last year, due to successful marketing activities before high season, which accounted for 41.06% of the Group's total turnover. These successful marketing activities resulted in a double increase in trade receipts in advance to US\$163.098 million as at the end of the quarter, which demonstrated a strong growth driver for the beverage business. During the period, leveraging on the business opportunities from the Chinese Spring Festival, with respect to tea products series, the Group continued to promote and actively build up the image of tea expert and enhance its results by extending flavor and adopting differentiation strategies. As far as the diluted juice series was concerned, "Daily C" and "Master Kong" were utilized interchangeably to enter the urban and rural markets simultaneously and achieved notable results. For mineralized water, the Group carried out outdoor activities and continued to use T.V. media and intensified the penetration of the products in the outer urban areas as well as to communicate with consumers, with a view of promoting the brands and the market exposure.

According to ACNielsen, for March 2007, Master Kong's market share in Ready-to-drink Tea by value was 53.6%, increased 1.5 ppt. when compared with same period last year, maintaining the No.1 position in the market. Master Kong's juice series gained No.3 position in the diluted juice market and 15.4% market share mainly attributable to the twin brands and the extended flavor and package. The Mineralized Water increased its market share by 12.5% and achieved the No.2 position. However Master Kong Mineralized Water held the leading position of the brands in North East and North China regions.

During the first quarter, the price of the principal raw materials PET resin and sugar was still high and the sales of mineralized water, which had a comparatively low profits, grew by 62% and 56% in volume and value respectively. As a result, gross margin for beverage business dropped by 2.01 ppt. to 37.68% but gross profit increased 11.93% when compared with last first quarter. Coupled with the well control in overall operating costs, profit attributable to equity holders of the Company was US\$24.417 million, grew by 17.03% when compared with same period in 2006.

Bakery Business

In the first quarter, turnover for the bakery business was US\$24.603 million, grew by 2.52%, representing 3.65% of the Group's total turnover. The Group's bakery business still continued to maintain such growth when compared to the slight increase of the entire bakery market mainly as a result of the adoption of the strategies in respect of brand management and the development of diversified products. During the period, the key products such as "3+2" Sandwich Crackers, Egg Rolls, Muffin and Sweet Yolk Biscuit maintained steady growth. According to ACNielsen for March 2007, Master Kong's sandwich crackers had a 19.1% market share and was No.2 in the market.

In the first quarter, under the pressure of the high raw material price, gross margin for bakery still grew by 1.75 ppt. to 37.21%, mainly because of the sales increase in high margin products and the modification in production process to cut cost. Profit attributable to equity holders of the company increased by US\$0.578 million to US\$0.667 million.

In the second quarter, the Group would adjust the production mechanism and exert itself in the study and development of those products which would result in higher gross profits for the Group and make improvements in the structure of channels for both wholesale and direct sales marketing.

Refrigerated Products Business

In the first quarter of 2007, sales revenue from refrigerated products business reduced by 2.43% over the same period of last year, which was mainly due to the low coverage of modernised channels to sell the Group's refrigerated products in Beijing and Guangzhou as well as the fact that the products lost their freshness after long distance of delivery and affected sales seriously. Thus, the Group decided to pull out from the markets in Beijing and Guangzhou in January. However, the sales in Shanghai, the major market of the Group's refrigerated product, remained robust. According to the information of ACNielsen for March 2007, Daily C 100% Juice gained 41% market share and the market share of its yogurt drinks rose to 20.5%.

For the first quarter, the Group's yogurt drinks accomplished quality upgrading. A large package of 950g for lactic acid bacteria drinks was put into production and launched to the market in March. To prepare for the high season, the Group started to launch advertising promotion in the second quarter and continued to make great efforts in brand effects and sales channels.

FINANCING

As of 31 March 2007, the Group's total liabilities amounted to US\$1,030 million, and total assets amounted to US\$2,149 million. The Group's total liabilities increased by US\$288 million as compared to US\$742 million as at 31 December 2006. The leverage ratio, calculated as total liabilities to total assets, increased by 7.59 ppt. to 47.92% as compared to 31 December 2006. The increase was mainly because of the growth in trade payables and the increase in trade receipts in advance. The Group's long-term and short-term loans increased by US\$65.826 million, as compared to 31 December 2006. The proportion between the Group's long-term loans and short-term loans was "29%:71%".

The Group's proportion of total borrowings denominated in US dollars, Renminbi and EURO was 51%, 25% and 24% respectively. In addition, the Group's transactions are mainly denominated in Renminbi. The appreciation of Renminbi against US dollars by 1.02% brought an exchange gain of US\$10.231 million during the first three months of 2007, represented by US\$0.699 million and US\$9.532 million of exchange gain included in the income statement and exchange translation reserve respectively. Accordingly, it is expected that there will be no significant adverse impact on the Group arising from the exchange rate fluctuation.

As of 31 March 2007, the Group had cash on hand and the bank balances of US\$285 million and no contingent liability.

HUMAN RESOURCES

In matching new factories for low-end noodle and bottled water and the development for the Group's "Better Access, Broader Reach" distribution strategy, the number of the Group's staff increased to 39,627 as at 31 March 2007 (31 December 2006:32,631). The Group provides a competitive salary packages, insurance and medical benefits to employees. The Group also pay high efforts in the management, planning and development in human resources. The good management system for human resources will enhance employees' contribution to the Group.

PROSPECTS

While the national economy of China continues to maintain steady and rapid development, the upgrading of the consumption structure has also accelerated, with the domestic demand market exhibiting huge potential.

Despite the impacts of the factors such as an increase in prices of raw materials and intense competition in the instant noodles market and the beverage market, the Group will consistently adhere to its market layout and cost control objectives and capitalize on its own advantages to make timely responses. Besides, it will formulate a strategy in line with development to improve the quality of management in an all-round manner and deeply explore the market so as to transform the advantages into strength.

With the support of those consumers who like "Master Kong" products, the Group achieved remarkable results in the first quarter. The management strongly believes that by leveraging on the business foundation established by the Group in the China market, good reputation, sound financial structure and the operating philosophy of "Integrity, Pragmatism, Innovation" together with the Group's spirit of "Human Orientation, Concentrated Operation, Factualism and Innovation", in the future, the Group will further strengthen the leading position of its products in the China market with sustained and steady growth in its results.
